

# Decon Officer Checklist

Incident Name:

Date:

Location:

Medical Officer:

**Decon Officer:** Manage decontamination procedures for casualties and Entry Team personnel within the area of disaster or emergency event. Supervise Decon personnel in the set-up and operation Contamination Reduction Corridor. Establish / Maintain liason with other Haz Mat Team sections.

**FOR COMMENT**

1) Obtain situation briefing from HazMat Team Leader.	
2) Don Position identification vest.	
3) Appoint and brief team members as needed.	
4) Identify existing and potential hazardous situations associated with incident.	
5) Keep all personnel informed of existing and impending hazards.	
6) Decon site (Contamination Reduction Corridor) is located in Warm Zone and controls egress from the Hot Zone. Decon site should be a straight path on level ground located up wind and up hill.	
7) Decon boundaries are conspicuously marked.	
8) Initial decontamination plan is based on a worst case situation — plan is modified eliminating unnecessary stations (or adapting) as more information is gained.	
9) All personnel in Decon should be wearing level of protection designated for decon (Maximum 1 level less than entry).	
10) Assume all personnel and equipment leaving hot zone are grossly contaminated.	
11) Follow prescribed decontamination procedures.	
12) When decon process is complete secure site until contaminated clothing and equipment can be removed.	
13) Maintain records and reports for documentation.	
14) When ordered, secure operations and replenish supplies.	
15) Provide documentation to HazMat Team Leader.
